SUMMARY

B.Tech Information Technology student focused on applied AI/ML and full-stack web development. Built and deployed several end-to-end projects spanning machine learning, full-stack web apps, and embedded systems, and completed an AI/NLP-focused internship. Co-author of one published and one upcoming conference paper. Oracle-certified in Cloud AI and Generative AI.

TECHNICAL SKILLS

- **Languages:** Python, Java, C, JavaScript, Dart, HTML, CSS
- **Web & Backend:** React, Bun.js, FastAPI, Flutter, Streamlit, REST APIs
- **Machine Learning:** Scikit-learn, Pandas, NLP pipelines, text classification
- **Tools:** MongoDB, Git/GitHub, Postman, Vercel
- **Embedded/IoT:** Arduino Uno, microcontrollers, sensor integration

PROFESSIONAL EXPERIENCE

AI Engineering Intern | Edunet Foundation (Microsoft & SAP CSR Initiative), Remote | *Dec 2024 – Jan 2025*

- Completed a structured AI/NLP curriculum covering predictive modeling, feature extraction, and data pre-processing.
- Built and deployed a text classification tool on Vercel to detect fraudulent spam messages using supervised ML models.

PROJECTS

Stockfy — Full-Stack Stock Maintenance Platform | React, Bun.js, MongoDB, Vercel |

- Built an inventory tracking platform with separate admin and user portals and real-time transaction logging, using a Bun.js backend and MongoDB for data storage. Demo: stockfy-ruddy.vercel.app

SMS Spam Detection — Applied ML Web App | Python, Scikit-learn, NLP, Streamlit |

- Built an NLP spam classifier using TF-IDF vectorization and a Scikit-learn model, achieving 94% accuracy on the test set; deployed live on Streamlit. Demo: sms-spam-detection-g8hwjjwbrqsgpzpdmabajob.streamlit.app

Drowsiness Detection System — IoT Driver Safety | C, Arduino Uno, Hardware Sensors, WiFi |

- Built an embedded driver-fatigue monitor using an Arduino Uno and infrared sensors, with C firmware that triggers a WiFi alert within 2 seconds of detecting drowsiness. Code: github.com/Aakashb004/Drowsiness_Detection_System_Using_Arduino

Two-Player Flutter Game — Mobile & Web | Dart, Flutter, Cross-Platform UI |

- Built a cross-platform 2-player game in Flutter with real-time score syncing, running on both web and mobile from a single codebase. Demo: twoplayapp.vercel.app

EDUCATION

B.Tech in Information Technology | Kalasalingam Academy of Research and Education | *2022 – 2026* | *CGPA: 7.98*

Higher Secondary Education | S B K Higher Secondary School | *2016 – 2022*

CERTIFICATIONS

- Oracle Cloud Infrastructure AI Certified Foundations Associate & Generative AI Certified Professional
- Postman API Fundamentals Student Expert
- Great Learning: Java Programming · UI/UX for Beginners · Introduction to AI
